### **CHARTWISE:CDI ESTABLISHES OEM RELATIONSHIP WITH MICROSTRATEGY**

*New alliance with business intelligence leader to provide ChartWise: CDI customers with detailed data and analysis proving ROI*

WAKEFIELD, R.I. (August 17, 2010) – [ChartWise Medical Systems](#), Inc. is pleased to announce that it has established an OEM relationship with [MicroStrategy](#), a leading worldwide provider of business intelligence software. ChartWise:CDI is a new software program that assists hospitals to improve clinical documentation to help maximize DRG-related reimbursements, reduce Medicare audit risk, and provide oversight and compliance. Through the MicroStrategy Business Intelligence platform, the ChartWise: CDI system will include a dashboard that will provide detailed reporting and comprehensive analysis of documentation data available in ChartWise: CDI. The dashboard will provide administrative users of ChartWise: CDI with access to key facility-wide financial and medical metrics and the data to measure improvement program effectiveness. In addition, customers will be free to analyze and present their data in a wide variety of formats. The new business intelligence functionality of ChartWise: CDI is an additional option that will be available by the end of 2010.

“By working with MicroStrategy we are bringing a new dimension and additional value to ChartWise: CDI. This new set of features will give hospital administrators the tools to go beyond our standard reporting package and drill down further into their data, which is very important given the challenges that many are facing,” said Dr. Jonathan Elion, creator of ChartWise: CDI. “Providing hospitals with the clinical documentation intelligence needed to maximize reimbursements and the tools by which to measure results uniquely positions ChartWise: CDI to help hospitals become more efficient.”
