**CHARTWISE MEDICAL SYSTEMS
EXHIBITS NEW CROSSWALK FUNCTIONALITY
AT HIMSS12 CONFERENCE**

SAN DIEGO-- (May ##, 2012) – ChartWise Medical Systems, Inc., (www.chartwisemed.com), the developer of ChartWise:CDI, will exhibit its innovative computer-assisted clinical documentation improvement (CACDI) software which includes support for both the current ICD-9 and forthcoming ICD-10 coding systems at the HIMSS12 Conference in Las Vegas beginning on February 21, 2012. ChartWise:CDI assists hospitals with improving the quality and completeness of their clinical documentation in order to help optimize DRG related-reimbursements, reduce audit risk and provide oversight and compliance.

“Most CDI vendors are focusing solely on the software they will provide once ICD-10 hits,” said Dr. Jon Elion, founder and CEO of ChartWise. “What ChartWise does is enable clinical documentation specialists and coders to become familiar with the new ICD-10 codes now, by showing the ICD-10 equivalent codes to the user. This exposure over the next couple years will prove invaluable when everything changes over. With this in mind, we look forward to demonstrating the value of our new cross-reference functionality to the attendees of HIMSS.”

ChartWise’s new functionality will not only be a benefit to its customers leading up to the transition to ICD-10, but will prove a useful tool afterwards as well, by allowing the user to view the older ICD-9 equivalent of the new ICD-10 codes.

ChartWise Medical Systems will be exhibiting at HIMSS12, which will be held at the Venetian Sand Expo at booth #3669.

About ChartWise

ChartWise Medical Systems, Inc. based in Wakefield, RI, is a medical software firm and the developers of ChartWise:CDI and ChartWise:CDI Personal Edition, a hosted solution for Computer-Assisted Clinical Documentation Improvement. ChartWise:CDI's clinical intelligence expertise assists physicians and clinical documentation specialists with increased efficiencies and completeness of documentation, queries and work flow. Developed by renowned physician, Jon Elion, M.D., ChartWise:CDI is the only documentation software that translates clinical language used by physicians into accurate diagnostic language required for documentation and reimbursement.
